For some time now, the media has been focusing on the possible collapse of the US dollar in the future. Economists have forecasted the decline of the US dollar against the euro. But, what does this really mean to you?

Most people don't understand the impact the collapse of the US dollar could have on the world economy. For the past two years the US dollar has declined 40% against the Euro. Throughout this period, America's trade deficit has deteriorated.

The United States of America, the most indebted country in the world, has no reserves to support its value. Russia and China have voiced their intention to switch their dollar reserves into Euro.

This could be a terrible blow to the US economy as global lack of confidence in the currency could hasten the decline of the US dollar. The collapse of the US dollar could trigger global depression. This means that nations with large debts will become bankrupt because their income from trade is not sufficient to service their debts.

The impact in Anglo-Saxon nations could result in severe poverty, starvation and crime would be on the increase. It could result in a total breakdown in society. If hyperinflation hit the US economy it could trigger global panic.

As a nation, it is our responsibility to work together to prevent hyperinflation. This is not just the responsibility of the government of the United States of America. The citizens of the United States of America have a part to play.

Most US citizens embrace the buy now pay later strategy. To be honest, too much credit only adds to the financial crisis. According to the experts, the collapse of the US dollar in the past was due to high unemployment rate, stagnant businesses and easy access to credit.

We don't have to let it happen again. There must be a way to prevent it. This eBook has core facts about hyperinflation and how to survive the coming collapse of the US dollar should the forecast materialize.
