## Citizenship between Past and Future

*Citizenship between Past and Future* brings together some of the most prominent scholars in the field of citizenship studies to assess, critically and contextually, the ongoing significance of citizenship as an object of study.

The authors reflect on the major issues and debates that have emerged in the field of citizenship studies over the last decade as well as to point out some of the new challenges ahead. The book recasts traditional thinking about citizenship beyond issues of legal status and investigates it rather as a strategic concept that is central in the analysis of identity, participation, human rights, and emerging forms of political life.

Seeking to broaden the debate on the meaning, significance, and practices of citizenship, the authors engage with an impressive and challenging array of theoretical and substantive issues. Citizenship is investigated in terms of debates over inclusion and exclusion, statism and cosmopolitanism, status and rights, gender and race, and multiculturalism and global inequality. The book revitalizes the debate over a key political concept and offers new ways of thinking about citizenship that take into account contemporary challenges.
