Optical Communication over Plastic Optical Fibers: Integrated Optical Receiver Technology (Springer Series in Optical Sciences) Mohamed Atef, Horst Zimmermann

This book presents high-performance data transmission over plastic optical fibers (POF) using integrated optical receivers having good properties with multilevel modulation, i.e. a higher sensitivity and higher data rate transmission over a longer plastic optical fiber length. Integrated optical receivers and transmitters with high linearity are introduced for multilevel communication. For binary high-data rate transmission over plastic optical fibers, an innovative receiver containing an equalizer is described leading also to a high performance of a plastic optical fiber link.

The cheap standard PMMA SI-POF (step-index plastic optical fiber) has the lowest bandwidth and the highest attenuation among multimode fibers. This small bandwidth limits the maximum data rate which can be transmitted through plastic optical fibers. To overcome the problem of the plastic optical fibers high transmission loss, very sensitive receivers must be used to increase the transmitted length over POF. The plastic optical fiber limited bandwidth problem can be decreased by using multilevel signaling like multilevel pulse amplitude modulation or by using an equalizer for binary data transmission.

From reader reviews:

Harold Martinez:

Why don't make it to be your habit? Right now, try to ready your time to do the important act, like looking for your favorite book and reading a publication. Beside you can solve your short lived problem; you can add your knowledge by the e-book entitled Optical Communication over Plastic Optical Fibers: Integrated Optical Receiver Technology (Springer Series in Optical Sciences). Try to the actual book Optical Communication over Plastic Optical Fibers: Integrated Optical Receiver Technology (Springer Series in Optical Sciences) as your buddy. It means that it can being your friend when you experience alone and beside that of course make you smarter than previously. Yeah, it is very fortunated for you. The book makes you much more confidence because you can know every little thing by the book. So , let me make new experience along with knowledge with this book.

Philip Newman:

The book Optical Communication over Plastic Optical Fibers: Integrated Optical Receiver Technology (Springer Series in Optical Sciences) make you feel enjoy for your spare time. You can utilize to make your capable far more increase. Book can to get your best friend when you getting strain or having big problem with the subject. If you can make reading through a book Optical Communication over Plastic Optical Fibers: Integrated Optical Receiver Technology (Springer Series in Optical Sciences) being your habit, you can get more advantages, like add your current capable, increase your knowledge about many or all subjects. You may know everything if you like wide open and read a book Optical Communication over Plastic Optical Fibers: Integrated Optical Receiver Technology (Springer Series in Optical Sciences). Kinds of book are several. It means that, science guide or encyclopedia or some others. So , how do you think about this guide?

John Ray:

Now a day individuals who Living in the era wherever everything reachable by match the internet and the resources inside it can be true or not call for people to be aware of each details they get. How people have to be smart in getting any information nowadays? Of course the answer then is reading a book. Looking at a book can help individuals out of this uncertainty Information mainly this Optical Communication over Plastic Optical Fibers: Integrated Optical Receiver Technology (Springer Series in Optical Sciences) book because book offers you rich information and knowledge. Of course the details in this book hundred % guarantees there is no doubt in it you know.

Tammy Paradis:

The publication with title Optical Communication over Plastic Optical Fibers: Integrated Optical Receiver Technology (Springer Series in Optical Sciences) contains a lot of information that you can discover it. You

can get a lot of gain after read this book. This specific book exist new knowledge the information that exist in this book represented the condition of the world right now. That is important to yo7u to be aware of how the improvement of the world. That book will bring you within new era of the glowbal growth. You can read the e-book on your smart phone, so you can read that anywhere you want.
