Teconomics of the Budget Ethics:

Hidden Fingers or Invisible Hands of Free-Markets-Capitalism

ABSTRACT

This book is an original work, which will address a few political complicities, which have been delegated to economists. Because the political history and political economic history have addressed these issues, perhaps a holistic 'Teconomic Budget Ethics' overview will realign the economic forces for a better future that we will all be endued. This study is about some current models, or failed models that have been extended outside their relative capacities. The models are tested, which will further illuminate the study subjects. That is the negative externalities costs accumulating as societal costs in aggregate data. In this book a simple Popperian test is applied to nominal and real study of aggregate economic data. Foundational construction will be lasting when it is on good structure, when scientific verifiable and falsifiable tests will assure theoretical soundness.

This is a new book on the organizational sources of micro, and macro, economic market-issues, like inequality-issues, and jobless recoveries, with less mathematics and more explanations. Oligopoly, Monopsony, livable-wages, living-incomes, mega-wealthy, cooperate-minimum-tax-rate, top-one-percent (TOPs) are among some of the topics of the book.

The book of organizational mixes of the free market capitalism with microeconomics of perfect competition, to relative imperfections of the market capitalism, and metamorphic transformations because of profits and competitive advantages pulls to oligopolies and monopolies give insightful illumination to important modern macrocosmic conundrums, like income inequalities, jobless-recoveries, which have plagued modern macroeconomic policies. The formation of market organizational complexities toward imperfect competitions, oligopolies, and monopolies pinpoints the inadequacies in monetary policy alone without the fiscal components of macroeconomics. This book discusses areas of microeconomic difficulties and concerns that morph into greater and larger problems and some remedies, which may work.

Author's Biography

Dr. Bahman Fakhraie, PhD in Economics, University of Utah, and his dissertation added to the influences of the Unorthodox Holistic Economic doctrine and complemented the modern orthodox economic theories, in the millennial age of technological paradigm shifts. He applies analytical skills with gestalt study of history, mathematics, and econometrics to economic analysis, with scientific background. He is a Published Economist, Author, Researcher, Investor, and Private Contractor. His skills are in international trade and finance, economic production (theory and application), growth and development theory, econometrics, agriculture economics, and agronomy. These are greatly valued skills combinations to employ. Dr. Bahman Fakhraie was invited by Senator Frank M. Browning to attend Utah State University, when Senator visited his family. After his master at Utah State University, he attended the University of Utah for the Ph.D. program in economics. He has met most of modern day science, business, and economic opinion leaders, and few other wonderful stars of their own fields, greetings and many thanks to you all.
