CompTIA A+ Exams Self-Practice Review Questions for 220-901 and 220-902: (with 140+ multiple choice questions) ExamREVIEW

Candidates for CompTIA A+ need to pass the 901 hardware exam and also the 902 software exam. This study guide covers BOTH. Hardware and software are always mutually dependent in the real world so it feels more natural to learn both together. Some older technologies are no longer covered in the new exams. You will need to learn PCs as well as mobile devices. Software-wise, you no longer need to deal with DOS. Instead you will see coverage on Windows 8/8.1 and other mainstream non-Windows operating systems such as Linux, Android, ios ...etc. We create these self-practice test questions referencing the concepts and principles currently valid in all these exams. Each question comes with an answer and a short explanation which aids you in seeking further study information. For purpose of exam readiness drilling, this product includes questions that have varying numbers of choices. Some have 2 while some have 5 or 6. We want to make sure these questions are tough enough to really test your readiness and draw your focus to the weak areas. Think of these as challenges presented to you so to assess your comprehension of the subject matters. The goal is to reinforce learning, to validate successful transference of knowledge and to identify areas of weakness that require remediation. The questions are NOT designed to “simulate” actual exam questions. “realistic” or actual questions that are for cheating purpose are not available in any of our products. This book does not cover performance based questions PBQs. We have another book which specializes in PBQs.
