Learning to Communicate in Science and Engineering: Case Studies from MIT (MIT Press) Mya Poe, Neal Lerner, Jennifer Craig

To many science and engineering students, the task of writing may seem irrelevant to their future professional careers. At MIT, however, students discover that writing about their technical work is important not only in solving real-world problems but also in developing their professional identities. MIT puts into practice the belief that "engineers who don't write well end up working for engineers who do write well," requiring all students to take "communications-intensive" classes in which they learn from MIT faculty and writing instructors how to express their ideas in writing and in presentations. Students are challenged not only to think like professional scientists and engineers but also to communicate like them. This book offers in-depth case studies and pedagogical strategies from a range of science and engineering communication-intensive classes at MIT. It traces the progress of seventeen students from diverse backgrounds in seven classes that span five departments. Undergraduates in biology attempt to turn scientific findings into a research article; graduate students learn to define their research for scientific grant writing; undergraduates in biomedical engineering learn to use data as evidence; and students in aeronautic and astronautic engineering learn to communicate collaboratively. Each case study is introduced by a description of its theoretical and curricular context and an outline of the objectives for the students' activities. The studies describe the on-the-ground realities of working with faculty, staff, and students to achieve communication and course goals, offering lessons that can be easily applied to a wide variety of settings and institutions.

From reader reviews:

Curt Roepke:

As people who live in the modest era should be change about what going on or details even knowledge to make them keep up with the era which can be always change and advance. Some of you maybe will update themselves by looking at books. It is a good choice in your case but the problems coming to you actually is you don't know what kind you should start with. This Learning to Communicate in Science and Engineering: Case Studies from MIT (MIT Press) is our recommendation to help you keep up with the world. Why, as this book serves what you want and wish in this era.

Lucy Fletcher:

A lot of people always spent their very own free time to vacation or even go to the outside with them household or their friend. Are you aware? Many a lot of people spent that they free time just watching TV, or even playing video games all day long. If you wish to try to find a new activity that is look different you can read the book. It is really fun for you personally. If you enjoy the book you read you can spent all day every day to reading a reserve. The book Learning to Communicate in Science and Engineering: Case Studies from MIT (MIT Press) it is rather good to read. There are a lot of people that recommended this book. We were holding enjoying reading this book. In case you did not have enough space bringing this book you can buy the particular e-book. You can m0ore simply to read this book through your smart phone. The price is not to cover but this book has high quality.

Mary Barnett:

Beside that Learning to Communicate in Science and Engineering: Case Studies from MIT (MIT Press) in your phone, it may give you a way to get more close to the new knowledge or details. The information and the knowledge you are going to got here is fresh from your oven so don't become worry if you feel like an previous people live in narrow community. It is good thing to have Learning to Communicate in Science and Engineering: Case Studies from MIT (MIT Press) because this book offers to you readable information. Do you occasionally have book but you would not get what it's exactly about. Oh come on, that wil happen if you have this in the hand. The Enjoyable set up here cannot be questionable, just like treasuring beautiful island. Use you still want to miss this? Find this book and also read it from now!

Roy Jordan:

Don't be worry should you be afraid that this book can filled the space in your house, you could have it in e-book approach, more simple and reachable. This specific Learning to Communicate in Science and Engineering: Case Studies from MIT (MIT Press) can give you a lot of good friends because by you investigating this one book you have matter that they don't and make anyone more like an interesting person. This book can be one of a step for you to get success. This e-book offer you information that perhaps your friend doesn't know, by knowing more than other make you to be great people. So , why hesitate? We need

to have Learning to Communicate in Science and Engineering: Case Studies from MIT (MIT Press).
