The aim of the annual W GIS workshop is to provide an up-to-date review of advances on recent development of Web and wireless geographical information systems, and new challenges and opportunities for researchers, developers and users in the GIS community. The main topic of the W GIS workshop is theoretical and technical issues of Web and wireless geographical information systems. This workshop followed the successful 2001, 2002 and 2003 editions, held in - oto, Singapore and Rome, respectively. The 2004 edition was held in Goyang, Korea. In its 4th year, W GIS reached new heights of recognition as a quality workshop for the dissemination and discussion of new ways of accessing and analyzing geospatial information.
